Service Offering

Enterprise DistribuTape and ControlCenter

Course Description

This two-day training course provides the advanced information you need to know about Gresham's Enterprise DistribuTape (EDT) and ControlCenter (CC) Enterprise Edition in a Tivoli Storage Manager (TSM) and ACSLS Manager environment.

This course covers these topics in detail:

- Features and benefits of EDT and ControlCenter Enterprise Edition
- Configuration
 - Super utilities that control drive, library, and volume handling, and more
 - LSM preferencing
 - Device mapping
 - Drive clearing
- Administration
 - Volume housekeeping
 - DR volume management
 - User authentication
 - Reporting
- Troubleshooting
 - Failure recovery
 - Common support issues

Who Should Take This Course?

Prerequisites: Installation and Configuration for EDT-CC

Audience: This advanced course is for the system or storage administrator who has mastered the basics of EDT-CC, such as installation and general configuration techniques, and wants to learn more about the sophisticated capabilities of

EDT-CC that allow fine-tuning of the EDT-TSM-ACSLs storage environment for maximum efficiency and ease of storage management.

Course Objectives

Configuration, Administration, Troubleshooting

Once you have completed this training course, you will be able to:

- Use advanced configuration techniques to fine-tune the operation of EDT in a TSM-ACSLs environment
- Apply advanced administration practices to perform volume housekeeping and disaster recovery volume management tasks
- Use vital user authentication tools to ensure maximum security for the storage system
- Employ the EDT-CC reporting function to monitor storage capacity and performance
- Troubleshoot issues that can occur with the configuration and operation of EDT in a TSM-ACSLs environment
- Apply failure recovery techniques to get the storage system back on track
- Take proactive measures to reduce failures and keep the storage system running
